Development Pool

The ASA Stats Development Pool has been created for the purpose of collecting funds for the development of ASA Stats in the pre-DAO phase. It is identified by the Algorand public address
PCXATSSLZVWFV76HO3YK4FUKUKC5TAAVF5I3YTT5GPV2IZYIVHK5HQ7IAE
and it will be referred to as *devpool* for the rest of this report and in all future transparency reports.

An amount of 50,000,000 ASASTATS was initially transferred on Fri, 26 Nov 2021 18:59:41 UTC from the Manager address to the *devpool*.

ASA Stats Token Presale

As defined in the ASA Stats Whitepaper, the members of the Asastatser and Investor groups had been allowed to purchase ASASTATS based on the number of slots they were qualified for. Every slot was supposed to be exhausted in a single transaction with an amount between 50 and 500 ALGO.

As defined in the Whitepaper, for every ALGO sent, the Keeper had to send 2,000 ASASTATS to the sender address.

Every qualified ASA Stats community member who expressed a desire to approach the presale had received a unique URL with the form where they had to read and confirm the following:

1. *By acquiring, engaging, holding, or participating in ASASTATS, the ASA Stats service, and any other affiliated content connected to such parties you agree to not holding ASA Stats team liable. You also agree that the team is presenting the products "as is" and is not required to provide any support or services. We suggest everyone do their due diligence to understand any risks that might be associated.*

2. *I represent and warrant that I am not a citizen or resident of the United States of America or any other country whose legislation conflicts with the present sale of ASASTATS token and/or the ASA Stats Project in general.*

They had to enter the Algorand address they were about to use to send ALGO, and also they had to click and select two checkboxes next to those two conditions in order to proceed to the page where the *devpool* address was presented to them.

The qualified members had started approaching the presale on Friday, 26 Nov 2021. The Keeper was obligated to start sending the ASASTATS to the purchasers after Fri, 26 Nov 2021 19:00 UTC.

From Fri, 26 Nov 2021 19:00:51 UTC to Tue, 30 Nov 2021 21:29:57 UTC, the *devpool* had received 13,715 ALGO.

For those ALGO received, in a similar period, the Keeper had sent a total of 27,430,000 ASASTATS to the purchasers' accounts.
